EXPERIENCES

Resapp : fullstack dev at Worldline Labs

MAY – AUGUST 2023

Conception and development of a booking service at the Worldline Labs infra team. Two main goals :

1. To test an emergent JS framework (Remult) and report about it
2. Use it by developping a service allowing users to book shared machines.

Used technologies : **Node, Remult** (JS), **Docker, Gitlab** (CI/CD)

annotation-app : intership au LIRIS

JUNE – AUGUST 2022

Conception et développement d'une **application web** permettant d'annoter manuellement des images d'archives de la ville de Lyon. L'application permet de naviguer entre les documents, d'afficher des statistiques et d'annoter les manuscripts avec des données sensorielles. Dans le cadre du projet SYSTESENS du laboratoire LIRIS.

Used technologies : **React (JS), Flask (Python), Github**

cooloc : personnal project

END OF 2021

Webapp development allowing to calculate shared expenses among roomates.

Used technologies : **React, NodeJS**
